

Course: Hyperion Planning Upgrade

Duration	Cost	Prerequisites
1-2 Days	£990 - £1,600	Planning Bootcamp or equivalent experience

Course Description

The one-day Planning Upgrade course is designed to bring administrators and power users up to speed on all the new features and functionality that have been added to Planning in 11.1.2.4.

It's very important to note, however, that each upgrade course is customised to your needs, depending not only on what version you're upgrading from and to, but also what features you may not have been fully leveraging in your old version. We can take material from our existing Planning Bootcamp class to fill in any knowledge gaps within your team and help you leverage the most out of Planning. In fact, the manual we provide is based on our Planning Bootcamp course so you receive a great reference manual for the version you are upgrading to.

Course Content

- Simplified Interface from an end-user perspective
- Simplified Interface Admin Features
- Dynamic Children Feature
- Added Calculation Manager Features
- Changes to the Calculation Manager for Developers
- Smart View for Planning - New Features
- New Submit Options
- Customer Form Styles

Course Outcomes

- Have a good understanding of what the new features and functionality are in the new version of Planning.
- Gain hands on experience with the various parts of the product depending on the depth of coverage for the topics covered and the length of the class.

Our training

All of our courses are taught by our certified Oracle Consultants, and have been developed by the leading Oracle Hyperion training providers, 123OLAP. We share real-life examples of implementations and all training manuals have been developed for later use as comprehensive reference manuals.
