

Oracle Hyperion Financial Management Admin

REFRESHER COURSE

Course duration:	3 days
Target audience:	HFM Admin Roles
Required:	Bringing your own/work laptop

Course Description

If you are an Administrator of the Oracle Hyperion Financial Management service in your organisation, this refresher course will be a perfect knowledge boost, whether you're at the beginning of your path, or simply looking for 'tips & tricks' and advanced features information.

In this 3-day course, you'll be fast tracked into HFM getting an overview of many features and having a chance to try them out in our HFM training environment.

The course mode will be geared toward being 'technical', working through examples and analysing common scenarios and best practices.

Expectations

After completing this refresher course, the Admins will have the knowledge to not only maintain their applications, but to develop new features, have more confidence supporting their end users and overall have an in-depth understanding of the service.

Course Agenda

Day 1

- Overview of HFM
- Dimension Overview
