

Oracle Hyperion Planning Admin

REFRESHER COURSE

Course duration:	2 days
Target audience:	Hyperion Planning Administrator Roles
Required:	Have your own/work laptop

Course Description

If you have been assigned to be the Administrator of the Oracle Hyperion Planning application in your organisation, this course will be a perfect knowledge boost, whether you're at the beginning of your path, or simply looking for 'tips & tricks' and advanced features information.

In the two days of this course, you'll be fast tracked into Oracle Hyperion Planning, getting an overview of many features and having a chance to try them out in our development Oracle Hyperion Planning environment.

The course is geared toward being 'technical', working through examples, analysing common scenarios and best practices.

Expectations

After completing this course Administrators will have the knowledge to not only maintain their applications, but to develop new features, have more confidence supporting their end users and overall, have an in-depth understanding of the service.

Course Agenda
